### **Fellow of Kotlin Mobile Application Development at Bytewise**

Today I am sharing my whole journey throughout the fellowship, Firstly I am very thankful to the management of Bytewise and our fellow lead Mr. Kashif who provides me a ladder to polish my skills of Kotlin. There is a three back when we started our journey in March First we learn a basic of Kotlin for three weeks then we move to Jetpack Compose a native platform or the User Interface and then we learn Database concepts all are done from the google developer official website:
